

# Access

Roads that service the parking areas for flats are well lit and secure.

The number of roads are kept to a minimum to increase efficiency.

We have tried to retain the existing main roads. It makes the phasing easier and reduces the disruption to residents.

Direct pedestrian and cycle access is retained through the site.

Footpaths are kept to a minimum and located along main roads and routes

The majority of parking for the houses is directly in front of the properties and accessed off the road, minimising parking courts.

 **Traffic calming measures.**  
We are looking at various options for reducing the speed of vehicles on the estate, to make it safe for drivers, cyclists and pedestrians.
