

Community Facilities

Residents will be consulted on facilities within each of the communal open spaces. The play equipment that was recently installed in Denmark Square will be relocated to a suitable position in one of the new communal spaces.

Existing shopping facilities at ground floor will be replaced and extended.

New purpose built Community Facilities will replace the current North Town Base. The new building will offer larger and improved facilities and services for the residents of North Town Estate and the surrounding area.

It is located close to North Lane to provide easy access to everyone. The new Base will also have its own parking for deliveries, facilitators and those with accessibility needs. External space may also be provided but the final design will be decided through further public events.

We are looking at ways to improve the access to the Ivy Fields play area to make it easier and safer to reach.
