

The open spaces:

- 77% of people liked the sense of openness
- Almost everyone agreed that the open space could be better used
- Only 26% of people want a large central open space
- Over 90% would prefer to see more private gardens
- 71% of residents want a separate area for dogs!
- Many wish to avoid the feeling of being closed in (like Woodlands Walk)

Other things you want in the plan:

- individual houses and gardens instead of flats
- safe play areas for children in sensible locations
- good sound insulation from neighbouring homes
- more residents parking in convenient locations
- minimise any flood impact
- stop Pegasus Avenue being used as cut through by lorries
- avoid winding roads

You asked for more information about :

- the phasing of the development
- the sizes of the new homes compared with the current flats
- scooter charging facilities and mobility issues for older people
- road names – views are mixed about whether to keep the same road names or change them
- whether bungalows are feasible in the development
- a policy on local trades & employment for the renewal project building works

Vision Consultation
